Resolution

If possible please keep all elements of your artwork 150dpi or higher. If this is not possible you can reduce this to 75dpi but graphics will appear soft from close up. If the artwork is supplied in a resolution lower than 75dpi the printed graphics will look very soft or even pixelated.

Colour Mode

Please supply all artwork in CMYK. We will convert the colour profiles to CMYK if needed. However this may result in a colour shift in the final print.
